## SOLIS® CLEAR WINDOW FILM

HEAT REJECTION / REDUCES FADING / SAFETY PROTECTION

SOLIS 70™ is a virtually clear window film that rejects heat and reduces fading *without* changing the appearance of the window. SOLIS Secure™ has all the heat rejection and UV control properties of SOLIS 70™, but combines them with an enhanced level of safety protection.\*

### PERFORMANCE DATA – SOLIS 70™

Visible Light Transmittance .....	70%
Ultraviolet (UV) Rejection .....	> 98%
Visible Light Reflectance .....	8%
Total Solar Energy Rejected .....	55%
Infrared Rejection .....	87%

Performance data based on film applied to 1/8" clear monolithic glass.

\* SOLIS Secure™ combines a heavier gauge film construction (i.e. 8.0 -mil vs. 1.5-mil) with an advanced super aggressive adhesive system. The thicker film and stronger adhesive system combine to create an almost invisible bond with the glass, minimizing the chances of glass that has been broken or shattered from being propelled at high speeds into interior areas or falling to sidewalks below the window. This also makes forced entry with a single blow virtually impossible, thwarting would-be intruders and giving police and other protection devices more time to respond.

SOLIS® CLEAR WINDOW FILM IS AVAILABLE IN BOTH STANDARD (1.5 MIL THICKNESS) OR SECURE (8.0 MIL THICKNESS) FOR EXTRA SECURITY.

SOLIS® CLEAR WINDOW FILM COMES WITH A FULL 10 YEAR WARRANTY AGAINST PEELING, CRACKING , CRAZING, AND DISCOLORATION.
